Description:

BEC2016, the 15th Biennial Conference on Electronics and Embedded Systems will be held in Tallinn, Estonia on October 3–5, 2016. Tallinn University of Technology has been hosted previous Baltic Electronics Conferences in 1987, 1989, 1991, 1994, 1996, 1998, 2000, 2002, 2004, 2006, 2008, 2010, 2012 and 2014. The aim of the Conference is to promote research and development in the field of electronics and embedded systems, particularly in the Baltic Sea region. Historically, Tallinn, the capital of Estonia, is unique in terms of its medieval Old Town, characterized by narrow, curved streets and tiled roofs. First records about Tallinn date back to the beginning of the last millennium. During its long and eventful history, Tallinn has been a remarkable centre of craftsmen, artists and merchants in Europe, belonging to the Hanseatic League.

The scope of the BEC2016 is:

“Smart space technologies and services” is very wide-ranging multidisciplinary research, development and application field of rapid growth and expansion. The conference BEC2016 will provide an opportunity to come together and discuss ones’ recent research work in defined topics of the field at an international forum in Tallinn, Estonia.

Topics:

1. Semiconductor Devices and Analog Electronics.
2. Digital and Embedded Systems.
3. Test, Verification and Dependability.
4. Instrumentation, Communication, Signal Processing and RF Solutions.
5. Cyberphysical and Cognitive Systems.
6. Power Electronics.
